

Internship USA

Engineering

mk North America, Inc.

is a member of the worldwide operating mk Technology Group, based in Troisdorf, Germany. (www.mk-group.com). For 20 years, mk North America, Inc. is a leading manufacturer of aluminum framing systems, modular conveyor systems and linear motion modules for a large variety of industries. The company is headquartered in Bloomfield, Connecticut, halfway between New York City and Boston. To learn more about us visit our website at <http://www.mknorthamerica.com/>.

Internship USA – Engineering

As an Intern at mk North America, Inc. in the engineering department you will support the day-to-day business but also be responsible for various projects. The day-to-day business ranges from designing conveyor systems to guarding systems. In several projects you enhance the engineering process using tools like Inventor 2010 or Visual Basics. In meetings and presentations you update your colleagues and discuss further steps.

During this internship you'll get familiar with engineering processes and structures. During several projects you'll gain skills in software (Inventor 2010, Visual Basics) and programming as well as skills in presentations and leading of meetings.

Closing Date November 12, 2010
Start March 2011
Duration 6 months
